

Remarks

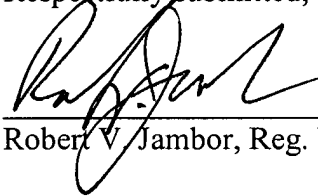

Reconsideration is respectfully requested.

Claim 8 has been amended to overcome the rejection based on Section 112.

The claims as amended each recite that the capacitors are "spaced for the power supply."

No such arrangement is described in the prior art. The cited reference, Patent No. 5,837,976, discloses capacitors to form a resonant circuit in the induction heating coil. The capacitors illustrated in FIGS. 4a and 4b are, however, associated with the respective power supply. As confirmed in FIGS. 5 and 8, the capacitors are within the power supply apparatus and not spaced from it as claimed here.

Respectfully submitted,

Robert V. Jambor, Reg. No. 23,080
